

A full designer palette of Colors

Classics

Classics feature our time-tested solids enhanced with fresh new colors derived from comprehensive research. And, as with all Evertuff products, the color goes all the way through the sheet...it's not merely applied to the surface like some other building materials.

Impressions

Impressions encompass a newly created range of marble, stone, and speckled patterns for an eye-appealing finish. Use them in the same settings as the *Classics* for a completely coordinated installation.

EverTuff eX

eX is unlike anything you have seen before. The unique semi-sphere surface texture adds a tactile quality with a clean modern look. This relief surface reduces signs of wear, and deters graffiti from ink pens and markers.

Mix & Match

Create your own Evertuff decor by mixing *Classics* with *Impressions* colors. The combinations are limited only by your own imagination. Explore these possibilities and create a bathroom you'll be proud of.

Actual colors may vary slightly from printed representation.

Evertuff colors couple the practicality of solid plastic sheet with innovative color choices. The solid polymer resin creates a tough self-lubricating surface that cleans easily and resists markings with pens, pencils, most markers and paints. Also, the solid plastic seamless sheet is water resistant, corrosion resistant, nonabsorbent, and impact resistant.
