

SHOWERS & DRESSING COMPARTMENTS

COMBAT BATHROOM ISSUES WITH HDPE

Commercial shower and dressing stalls are placed in harsh, high-traffic environments with high moisture and humidity, making the material susceptible to mold, mildew, and rust.

Scranton Products 1" HDPE shower and dressing stalls are the ideal material choice for these applications.

LONG LASTING & LOW MAINTENANCE

HDPE shower stalls and dressing compartments are impact resistance and won't delaminate or corrode, which cuts down on costs and maintenance.

Advantages of HDPE showers and dressing compartments are:

- Dent, scratch and graffiti resistant
- Naturally germ resistant
- Easy to clean and low maintenance
- Never rust, corrode, or delaminate
- Never needs painting

NATURALLY GERM RESISTANT

Scranton Products performance plastic partitions are naturally resistant to common bacteria including MRSA. Testing has shown that after 24 hours, 98.4% of MRSA died off the surface of solid plastic without the use of cleaning solutions or antimicrobial additives. What's more, Scranton Products partitions are fully power washable and steam cleanable.
